Victorian Treasure Decor and Border - Installation instructions

Victorian Treasure is inspired by handmade cement tiles. True to the original artisan version, each tile is a little different and does not necessarily match 100% with its neighbour.

For the best result, follow these rules of thumb:

First lay out the entire composition of decor and border until you are happy with the centring of the design in the room and the matching up of all the tiles, before you start applying the adhesive.

First positioning all the **flower decor tiles** in the middle of your floor, making sure that the 4 quadrants together form nice flowers

Then, lay out the borders:

Starting from each corner, make a row with border tiles.

'Mix and match' the tiles to obtain the best result:

As the tiles are not all 100% equal, check the alignment and add each new tile to the side where it matches best.

Continue until the 4 border rows are complete and to your liking.

End with the corner tiles.

Select border tiles which fit the adjacent rows, cut them at an angle and miter them.
